

User Persona Report – Shreya Sharma

1. Introduction

A user persona is a fictional representation of a target user created based on research and user behavior. It helps designers and developers understand user needs, goals, and challenges while developing a product or service.

2. Persona Details

- **Name:** Shreya Sharma
 - **Age:** 22 Years
 - **Occupation:** College Student
 - **Location:** Bangalore, India
 - **Education:** B.Tech (3rd Year)
 - **Technology Proficiency:** High
 - **Devices Used:** Smartphone, Laptop
 - **Internet Usage:** High
-

3. User Background

- Shreya is a 22-year-old engineering student.
 - She travels daily between her home and college.
 - She frequently uses public transport and ride-hailing services.
 - Safety during travel, especially at night, is her primary concern.
 - She prefers reliable and secure transportation solutions.
-

4. User Goals

- Travel safely at all times.
- Reach destinations without worry.
- Share live location with family members.
- Get immediate help during emergencies.
- Choose verified and trustworthy drivers.

- Track rides in real-time.
-

5. User Needs

- Easy-to-use safety features.
 - SOS emergency button.
 - Live location sharing functionality.
 - Driver verification and identification details.
 - 24×7 customer support service.
 - Reliable ride tracking system.
-

6. User Frustrations

- Lack of safety while traveling alone.
 - Absence of real-time tracking in some applications.
 - Difficulty trusting unknown drivers.
 - Delayed emergency responses.
 - Complicated and confusing app interfaces.
 - Limited safety-related features.
-

7. User Behavior

- Uses ride-hailing applications 3–4 times per week.
 - Prefers cashless payment methods.
 - Shares ride details with family members.
 - Reads reviews before booking rides.
 - Looks for discounts and offers regularly.
 - Depends heavily on smartphone applications for travel.
-

8. Personality Traits

- Moderately Extroverted

- Creative Thinker
 - Independent in Decision Making
 - Busy Lifestyle
 - Responsible and Safety-Conscious
-

9. Preferred Communication Channels

- Instagram
 - WhatsApp
 - Google Maps
 - YouTube
 - Gmail
-

10. Frequently Used Applications

- Uber
 - Ola
 - Paytm
 - Google Maps
-

11. User Scenario

Shreya attends a late evening class and needs to travel back home safely. She books a ride through a trusted ride-hailing application. Before starting the journey, she shares her live location and ride details with her parents. During the trip, she tracks the ride in real time and uses the app's safety features whenever necessary. She reaches home safely, giving both herself and her family peace of mind.

12. Conclusion

This persona represents young female college students who frequently travel and prioritize safety. Understanding Shreya's goals, needs, and frustrations helps in designing a secure, user-friendly, and reliable transportation application that enhances user confidence and safety during travel.
